### 3 Description

#### What is this tool about?

Citymapper is a comprehensive navigation app designed to help users navigate urban environments efficiently. It integrates real-time data on public transportation, cycling routes, walking paths, and ride-sharing services to provide optimal route options and travel times.

#### For which purposes is it used?

Citymapper is used to plan and navigate city journeys using various transportation modes. It helps users optimize their travel routes, reduce commuting times, and make informed decisions about transportation options available in urban areas.
